Manufactures representative
Of Applied Air conditioning Equipment
P.O. Box 947 (806) 745-3405
Lubbock, Texas 79404

Engineered Equipment

Energy Recovery Units, Tempered Makeup Air Units, Face and bypass coils, non-freeze steam coils, hot and chill water coils.

VIBRO-ACOUSTICS™

Vibration isolation and seismic restraint equipment.

Expansion Tanks, flash tanks, booster tanks, air separators, chemical bypass feeders.

Manufacturer of Variable Frequency Drives for the HVAC industry.

Dehumidification equipment for indoor pool and spa applications, packaged dehumidifiers for 100% outdoor air applications and interior space control for humidity sensitive areas such as print shops.

Complete line of humidification equipment – live steam, gas fired humidifiers, and electrode steam.

Airflow Monitoring Stations.

Manufacturer of high intensity gas fired infrared heaters and low intensity tube type heaters.

Manufacturer of high intensity gas fired infrared heaters and low intensity infrared tube type heaters.

Piping packages with automatic flow control valves, manual balancing valves and temperature control valves.

Physical water treatment, centrifugal separators and systems, tower sentry systems, sand filters and chemical pot feeders.

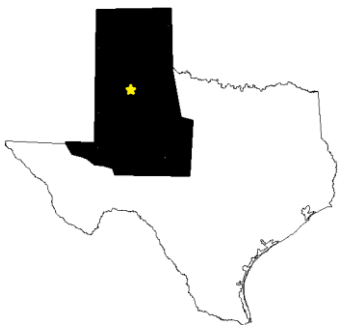

Manufacturer of close coupled and frame mounted centrifugal pumps, , horizontal split case, sewage ejection pumps and condensate return pumps.

Manufacturer of heating circulator pumps, skid mounted booster pump systems, integrated VFD pumps, sewage ejection pumps and condensate return pumps.

Manufacturer of cast iron modular condensing boilers systems for commercial and residential use.

Engineered Equipment

Manufacturer of direct burial piping systems for chill water, heating water and steam.

The United States largest manufacturer of Fan Coil Units.

Markel is one of the largest manufacturers of Electric Heating Equipment in the United States.

Manufacturer of Hydronic Boilers and Domestic Water Heaters.

Manufacturer of steam pressure reducing/temperature regulating valves and steam specialties equipment.

Manufacturer of Coalescing Air elimination, dirt separation and combination air/dirt products.

Complete line of UVC emitters for indoor air applications for residential and commercial air applications

Manufacturer of gas fired unit heaters, hydronic unit heaters, make up air units for direct and indirect fired applications.

Manufacturer of custom air handling units for indoor and outdoor applications.

Boiler breeching systems, including positive pressure AI 294C vent material for condensing boilers.

Manufacturer of VRF and Mini-Split products.
